

## **New Policy for Receivers** **Effective Immediately**

We have recently received some comments on warranty returns. In order to facilitate our warranty process at a faster pace we will be implementing the following:

- The normal C.M. range for receivers will be 90 to 100 C.M. This range accounts for over 90% of the equipment we sell and should accommodate most jobs.
- Receivers that range between 101 to 125 C.M. will be available for an additional \$2.00 per receiver. These should take care of any trouble situations which may occur, such as a signal jumping onto utilities.
- Special order receivers between 126 to 150 C.M. will be an additional \$6.00 per receiver. Anything over 150 C.M. will be an additional \$10.00 per receiver. Please allow two extra days for special order receivers to be made.
- When receivers are sent in for warranty repair, they will be returned within the normal range of 90 to 100 C.M. unless otherwise specified. If special orders are requested, the above pricing will apply.

## **New Pricing on Batteries (6.2V and Micro):**

Due to the rising costs we are incurring with Energizer the new pricing structure for all our batteries will be as follows:

Individual:  
\$6.00 per battery

Package of 25:  
\$4.50 per battery

Package of 50:  
\$4.30 per battery

Package of 100:  
\$4.00 per battery

## **2011 Chicago Seminar Date Change**

The Chicago seminar dates have been moved to August 29 and 30 in order to accommodate the new dealerships that have joined our team.
